

Description

This document specifies the carbon footprint of Cocouz Oy in tonnes of CO₂e.

Parameters

Company:	Cocouz Oy
Period:	01.01.2025 – 31.12.2025
Calculation:	25.8.2026, Reforest Finland Oy
Total Carbon Footprint, market-based:	130,5 t CO ₂ e

Methodology

Greenhouse gas emissions have been calculated in accordance with the GHG Protocol Corporate Accounting and Reporting Standard and the Corporate Value Chain (Scope 3) Standard. Emissions are reported as carbon dioxide equivalents (CO₂e) using 100-year global warming potentials (GWP). The inventory covers Scope 1, Scope 2 and relevant Scope 3 categories. Emissions are estimated using activity data and a combination of supplier-specific and secondary emission factors where primary data is not available. The calculation includes direct and indirect Scope 1, Scope 2 and Scope 3 emissions from purchased goods & services, energy related activities, waste, wastewater, business travel and employee commuting.

Info

The purpose of this document is to provide Cocouz Oy's stakeholders with an accurate representation of the greenhouse gas emissions associated with the company. This document is delivered upon request and should not be forwarded without permission from Cocouz Oy. Cocouz Oy has calculated its carbon footprint in collaboration with Reforest Finland Oy. Reforest Finland Oy is confident that, at the time of review, the calculation accurately represented the carbon footprint in accordance with the previously described methodology.

In defining emission factors, primary data from Cocouz Oy's stakeholders, as well as from the Ecoinvent, Exiobase and Defra databases, Statistics Finland data and field research have been utilized.
